suggested donation \$5

Imagine a world without fish. It's a frightening possibility, and it could come true. A Sea Change follows the journey of retired history teacher, Sven Huseby, on his quest to discover what is happening to the world's oceans. After reading Elizabeth Kolbert's "The Darkening Sea," Sven becomes obsessed with the rising acidity of the oceans and what this world-wide crisis bodes for mankind. In his correspondence with his young grandchild, Elias, he mulls over the world that he is leaving for future generations.
